Manual exposure
Aperture-priority AE
Shutter-priority AE
Program AE

Scene Intelligent Auto
This mode is fully automatic.
Flash Off
This mode prevents the flash from firing.
Creative Auto
This mode allows the user to adjust the depth of field, drive/self-timer, and flash firing. The camera defaults to the Scene Intelligence Auto if not otherwise programmed.

Landscapes
This mode is best for wide scenery.

Close-up
This mode is used for shooting small things close or for great detail. The use of a macro lens can make small things appear larger than they are.

Portrait
This mode blurs the background to make the human subject stand out while also softening skin tones and hair.

Sports
This mode is used for moving objects such.

Night Portrait
This mode is used to create portraits with natural-looking light at night. The use of a tripod is recommended.

Movie Shooting
This mode is for shooting video.
